NOKIA EASY START STEP BY STEP GUIDE

Getting Started:

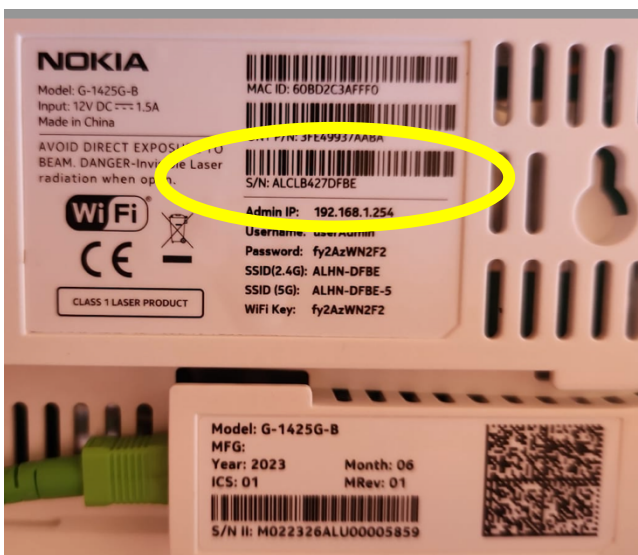

How to get to the Nokia Easy Start Menu: selecting the correct network:

Once you have completed the physical installation, on your mobile device, go to your "Wi-Fi connection / sign-in to Wi-Fi network."

Note the **last four digits/letters of the SERIAL NUMBER** of the ONT: the SN of the ONT is on the box that the ONT came in and on the back of the unit.

Select the network ALHN-XXXX-5.

XXXX = the last 4 digits/letter in between the dash's will be the same as the last 4 digits/letters of the ONT's serial number you have installed.

STEP 1:

Open your browser (e.g Google Chrome) and go to the following web page:

<https://activate.fibertime.network>

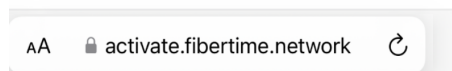

The above step will take you to the following screen.

A screenshot of the Fibertime Networks login page. At the top left is the "fibertime™" logo. Below it are two input fields: "Username" and "Password". A red arrow points from the "Username" field to the "STEP 2" box. Below the input fields is a grey "SIGN IN" button. At the bottom, there is a "Language: English" dropdown menu and a "© 2023 Nokia" copyright notice.

STEP 2:

Enter your username and password to sign in.

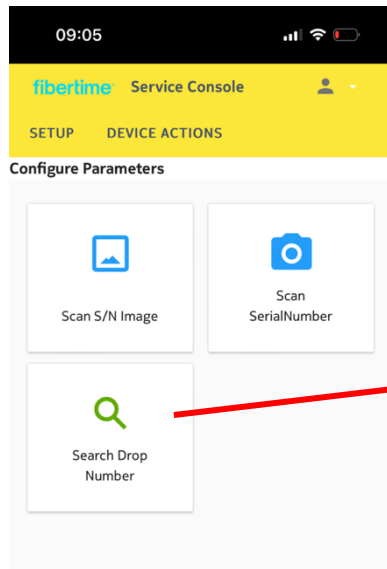

You will get this login details from your supervisor / contractor.

Provisioning an ONT:

STEP 3:
Select: **SEARCH DROP NUMBER**

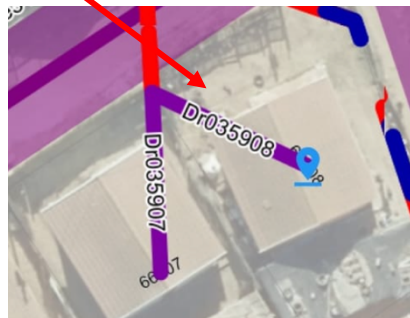

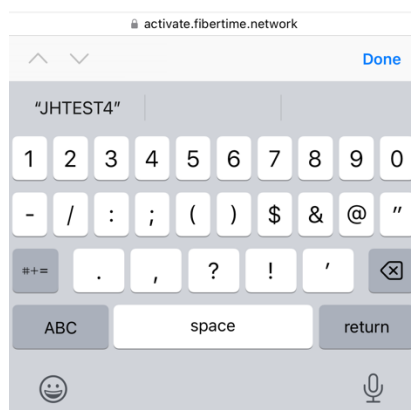

STEP 4:

Enter drop number that is allocated for the house you are working at.

If the drop number does not match the house it was allocated to, the drop number will not be accepted.

Get the Drop Number from the 1Map Field App where you are installing at. ("Cables" must be selected under Layers – Overlays for Drop number to appear)

STEP 7:
Click on **Activate ONT**.

Remember this will only work if
there are 4 or more green lights on
the ONT.

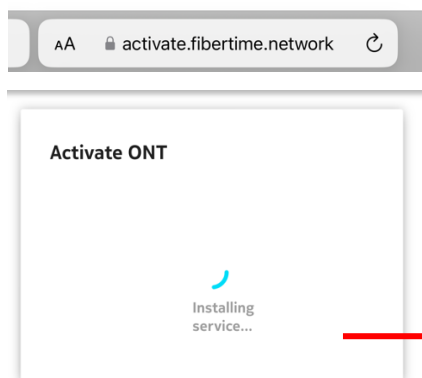

STEP 8:
The web browser will ensure that
all the optical measurement are
within spec before provisioning
the ONT.

Discover a new way to
experience *the internet*

STEP 9:
A message will pop up informing
you of the optical measurements.

Only if these are **within spec** you
will be able to click on install
ONT.

STEP 10:
The ONT will automatically
provision and activate itself.

Once this is complete there
should be **5 lights visible** on the
ONT and you should be able to
connect to the internet.

Activate ONT

Congratulations! Your connection
is in progress.

STEP 11:

If you completed
all the steps
accurately this
message will pop
up and the ONT
should be active.

EXAMPLE:

This is what a
completed activation
and provisioning
should look like.
