

Home Installation & Activation – Standard Operating Procedure (SOP)

Document Owner: Velocity Fibre Operations

Audience: Contractors / SMMEs / Installation Teams

Effective Date: 2026-01-10

Version: 1.0

1. Purpose

The purpose of this SOP is to define the standard process to be followed by all Contractors and SMMEs when performing **home installations and activations** on the Fibertime network. This SOP ensures:

- Accountability and control of stock and equipment
- Consistent, high-quality installation standards
- Accurate system activation and records
- Fair and auditable payment processing

Compliance with this SOP is **mandatory**. Non-compliance may result in delayed payments, recovery of stock costs, or suspension of work allocation.

2. Scope

This SOP applies to:

- All home fibre installations
 - All router, ONT, Mini-UPS and material allocations
 - All activations and IMap updates
 - All Contractors and SMMEs working on behalf of Velocity Fibre
-

3. Roles & Responsibilities

3.1 Velocity Fibre

- Allocate stock and equipment
- Capture and retain stock allocation records
- Verify installations and activations
- Approve work for payment

3.2 Contractors / Installation Teams

- Sign for and safeguard issued stock
 - Install equipment according to approved standards
 - Capture all required photos and serial numbers
 - Ensure correct activation and status updates
-

4. Equipment & Stock Allocation Process

4.1 Stock Allocation

- All routers, ONTs, Mini-UPS units and materials are issued using the **HOME DROP AND ACTIVATION – EQUIPMENT ALLOCATION FORM**.
- Stock is allocated **per team**, either daily or as required.
- The allocated team member must:
 - Complete all required fields on the form
 - Sign for the stock issued

4.2 Record Keeping

- A clear photograph of the completed allocation form must be taken by:
 - The Activations Manager **or**
 - The Velocity Fibre representative issuing the stock
- The photograph must be posted to the designated **Velocity Fibre WhatsApp Administration Group** for record and audit purposes.

4.3 DR Number Population & Stock Return

- Each router / ONT issued must be linked to a **DR Number** (unique house identifier).
- Once installations are completed:
 - All DR numbers must be populated on the allocation form
 - ONT and Mini-UPS serial numbers must be recorded
- The completed form must be returned to Velocity Fibre.

4.4 New Stock Issuance Rules

- **No new stock will be issued** unless:
 - The previous allocation form is fully populated
 - All issued equipment is accounted for
 - This process ensures traceability of all equipment and allows Velocity Fibre to identify the exact property where equipment is installed if activation issues arise.
-

5. Home Installation Specifications

All installations must comply strictly with the approved Velocity Fibre / Fibertime standards.

5.1 Applicable Installation Standards

Installers must refer to and comply with the following documents based on housing type:

- **Installation Standards – Formal Housing (Rev 1.1)**
- **Installation Standards – Informal Housing (Rev 1.1)**
- **Installation Standards – RDP Housing (Rev 1.1)**

5.2 General Installation Principles

- Neat, secure and professional workmanship
- Correct drop cable routing from pole to home
- Proper sealing of entry points
- Correct mounting of ONT and Mini-UPS
- Safe and compliant power connections

Failure to adhere to these standards may result in rework at the contractor's cost.

6. Router & ONT Activation Process

6.1 Activation Standard

- All activations must follow the **Nokia Easy Start Guide (v2.3)**.
- The ONT must only be activated once:
 - Physical installation is complete
 - Optical power levels are within specification

6.2 Key Activation Requirements

- Correct DR number selected
- Correct ONT serial number scanned
- Activation code entered accurately
- Confirmation of active broadband lights

Incorrect or incomplete activations will delay installation closure and payment approval.

7. 1Map Update & Evidence Capture (Critical Section)

7.1 Mandatory Process

- **Home Sign-up must be completed first.**
- Only after sign-up is complete may the **Home Installation** section be completed.
- If Home Installation is not completed correctly:
 - Installation photos cannot be captured
 - The job will not reflect correctly on 1Map

7.2 Required Photos & Serial Number Capture

The following items are **mandatory** under the Home Installation workflow:

1. Property frontage – house with visible street number
2. Installation location on wall (before install)
3. Outside cable span (pole to pigtail screw)
4. Home entry point – outside
5. Home entry point – inside
6. Fibre entry to ONT (after install)
7. Overall work area after completion
8. ONT barcode – scanned and photographed
9. Mini-UPS (Gizzu) serial number
10. Power meter reading at ONT (before activation)
11. Active broadband light visible
12. Customer signature

7.3 Installation Status

- A **blue status** on 1Map indicates:
 - Sign-up and Home Installation statuses changed to **INSTALLED**
 - A blue status **does not guarantee** that all photos are correct.
 - Missing or incorrect photos will be communicated via WhatsApp and must be rectified.
-

8. Payment & Approval Process

8.1 Payment Basis

- Payment is governed by the **Master Build Agreement** signed between the Contractor and Velocity Fibre.

8.2 Submission for Payment

- Contractors must submit completed **DR Numbers** via the agreed reporting structure (e.g. Excel submission).

8.3 Payment Reconciliation Checks

Before approval, Velocity Fibre will verify:

- Actual system activation of the DR number
- Router / ONT serial numbers match system records
- All required IMap photos are captured correctly
- Serial numbers correctly recorded on IMap
- IMap status updated to **Blue (Home Installation – Installed)**

8.4 Non-Compliance

- If any requirement is missing or incorrect:
 - The DR will **not** be approved for payment
 - Payment will be held until all requirements are fulfilled
-

9. Compliance & Enforcement

- This SOP forms part of the contractual obligations of all Contractors and SMMEs.
 - Repeated non-compliance may result in:
 - Withholding of payments
 - Recovery of stock costs
 - Removal from the Velocity Fibre contractor program
-

10. Stock Liability & Asset Accountability Clause

10.1 Ownership of Equipment

- All equipment, materials, routers, Optical Network Terminals (ONTs), Mini-UPS units, cabling, accessories, and consumables issued by Velocity Fibre remain the sole property of Velocity Fibre at all times unless expressly transferred in writing.

10.2 Acceptance of Liability

- Upon signing the Home Drop and Activation – Equipment Allocation Form, the Contractor and/or assigned installation team accepts full responsibility and liability for all equipment and materials issued to them, from the moment of allocation until:
- The equipment is:
 - Correctly installed,
 - Activated on the Velocity Fibre system, and
 - Accurately recorded against a valid DR Number; or
- Returned to Velocity Fibre in good working condition and recorded accordingly.

10.3 Stock Control & Traceability

The Contractor acknowledges and agrees that:

- All issued equipment must be traceable to:
 - A valid DR Number,
 - A physical installation location, and
 - A recorded serial number on Velocity Fibre systems (including 1Map).
- Failure to populate DR Numbers, serial numbers, or installation evidence shall be deemed non-compliance and loss of traceability.

10.4 Loss, Damage, or Unaccounted Equipment

The Contractor shall be fully liable for any equipment that is:

- Lost
- Stolen
- Damaged through negligence or improper handling
- Not installed
- Not activated
- Not recorded correctly
- Not returned
- Not traceable to a DR Number

Velocity Fibre reserves the right to recover the full replacement cost of such equipment from the Contractor.

10.5 Financial Recovery & Set-Off

Velocity Fibre may, at its sole discretion:

- Deduct the replacement cost of lost or unaccounted equipment from:
 - Any outstanding invoices,
 - Current or future payments,
 - Retentions or holdbacks; or
 - Issue an invoice to the Contractor for the replacement value.
- Non-payment of such recovery may result in suspension or termination of work allocation.

10.6 Conditional Stock Re-Issuance

The Contractor acknowledges that:

- No additional equipment or materials will be issued unless:
 - All previously allocated stock has been fully accounted for, and
 - Allocation forms have been returned and verified.
- Velocity Fibre reserves the right to withhold further stock allocation in cases of repeated non-compliance.

10.7 Audit & Verification Rights

Velocity Fibre reserves the right to:

- Audit stock records, allocation forms, serial numbers, and installation evidence at any time
- Conduct physical or system-based verification
- Require corrective action or rework at the Contractor's cost where discrepancies are found

10.8 Survival of Liability

This Stock Liability Clause shall survive the termination or expiry of any agreement between Velocity Fibre and the Contractor until all issued stock has been fully reconciled and accounted for.

10.9 No Waiver

Failure by Velocity Fibre to enforce this clause at any stage shall not constitute a waiver of its rights.

11. Signatories

By signing below, the undersigned acknowledges receipt of and confirms that they have read, understood, and agree to comply with the **Velocity Fibre Home Installation & Activation Standard Operating Procedure**, including all operational, technical, administrative, and payment-related requirements.

The undersigned **specifically acknowledges and accepts full responsibility and liability** in terms of the **Stock Liability & Asset Accountability Clause**, including but not limited to the safeguarding, traceability, installation, activation, and return (where applicable) of all equipment and materials issued by Velocity Fibre.

The undersigned further agrees that this SOP forms an **integral and binding part of the contractual relationship** between Velocity Fibre and the Contractor and that non-compliance may result in withheld payments, recovery of costs, suspension, or termination of work allocation.
